ABOUT GOLFZON

GOLFZON AMBASSADORS

OVERVIEW OF GROWTH

GOLFZON BY
GLOBAL NETWORK

Golfzon,
the global leader in
golf simulators,

was founded in 2000 with the aim of providing enjoyment and training to golf enthusiasts worldwide. Golf Inc. Magazines' most innovative products of 2022, and Golf Digest Editors' Choice Award for best simulator from 2017-2021, Golfzon leads the way in innovation and expertise

Golfzon has been continuously researching and developing groundbreaking technologies to provide truly-realistic golf experience anytime, anywhere. The evolution of Golfzon will continue to enable more people to enjoy golf to the fullest.

With over 545 patents, Golfzon continues to lead the industry offering a wide range of products for various virtual sports. The introduction of TwoVision NX has propelled Golfzon into the spotlight, delivering the ultimate golf experience.

GOLFZON AMBASSADORS

SUNGJAE IM

Thanks to Golfzon's impressive engineering system, I am now able to work on my golf game with real-time feedback regardless of the weather or outside conditions. Golfzon's precision technology enables me to play and swing my way, even indoors. This means that no matter what time of day it is, I can continue to improve my skills and enjoy golf to the fullest.

DAVID LEADBETTER

The adjustable electronic floor plate matches the exact lie of the ball and makes the play feel very technically accurate. Having played on a lot of prestigious golf courses, the fantastic graphics combined with the simulator technology make it feel like you are outside playing on the course.

Enjoy the ultimate golf experience

PART 2

PART 3

WHY GOLFZON? ONLY GOLFZON

Course Mapping

Every square inch of virtual Golfzon courses is measured by our proprietary tri-layer videography technology to create crisp, 4K HD visuals.

Unlock New Possibilities with Unreal Engine 5.x

Golfzon's shift to Unreal Engine 5.x marks a new era in virtual golf. Our simulators now feature stunningly realistic courses, lifelike environments, and precise ball dynamics for an authentic experience. Optimized for smooth gameplay, Unreal Engine 5.x also opens doors to exciting innovations in virtual and augmented reality. At Golfzon, we're dedicated to using the latest technology to deliver the most immersive golf experience to our global community.

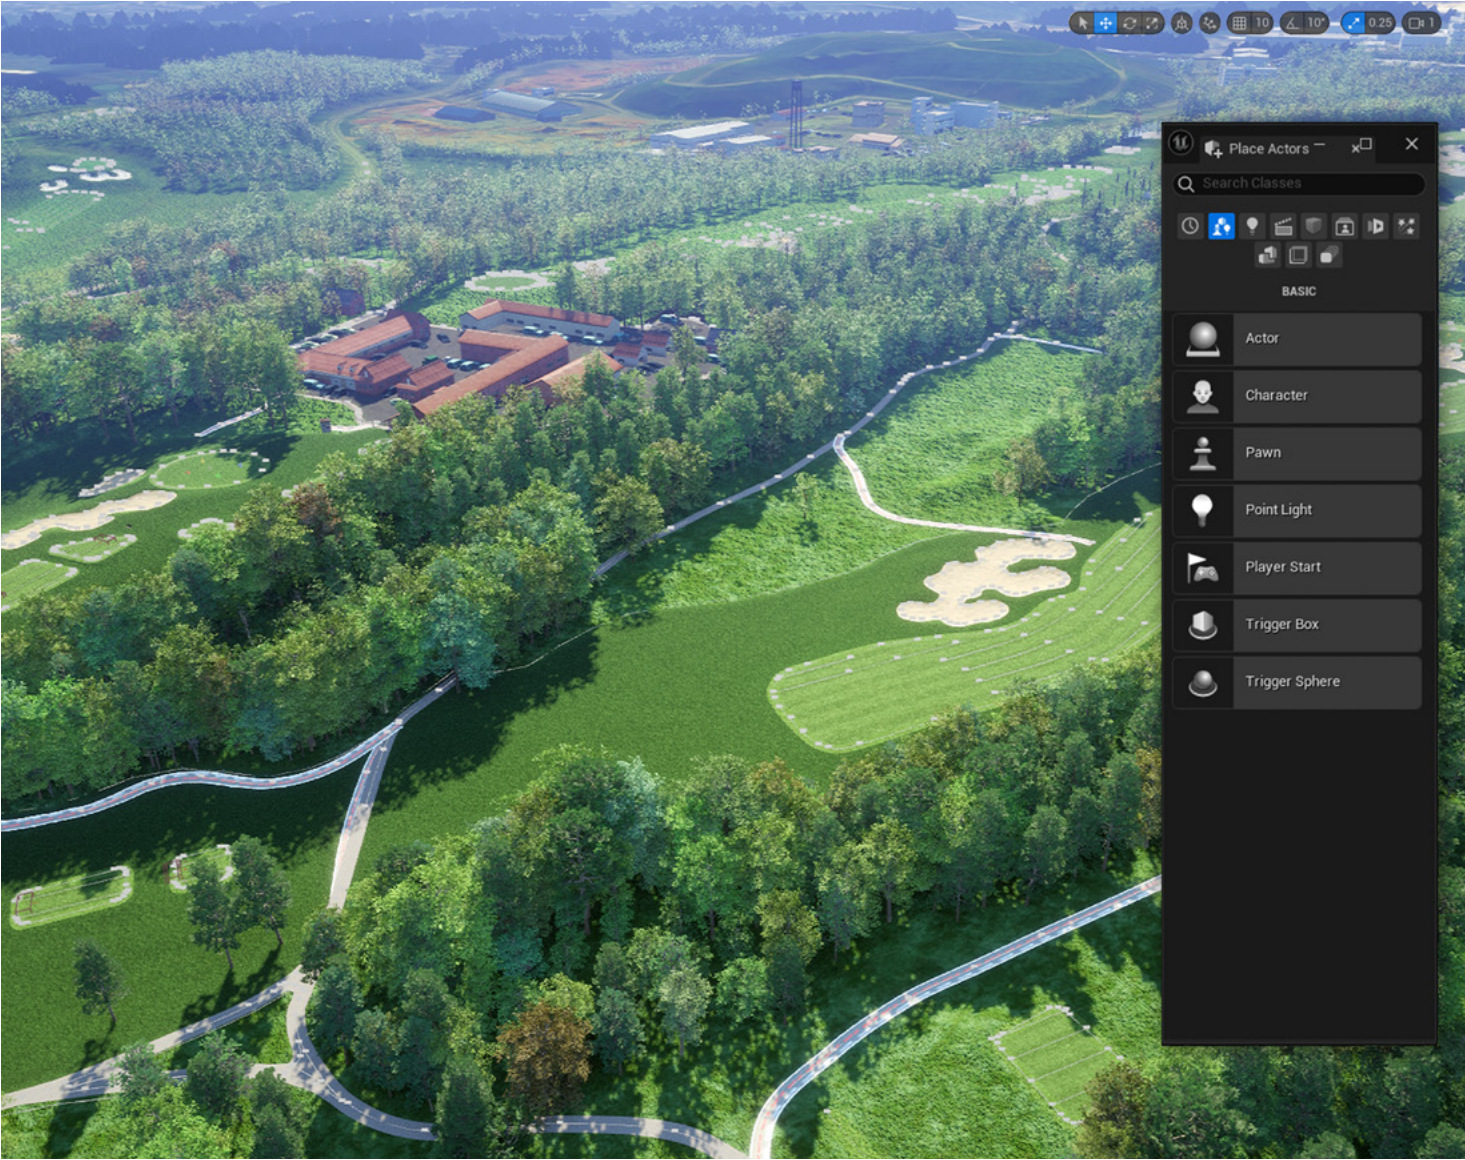

Drone course flyover mapping is paired with topographical and GPS data to provide the most robust and realistic courses available.

Each course is meticulously designed and created from start to finish in 2 months.

Every square inch is measured to provide golfers with up to 15 degrees of elevation change while utilizing a swing plate during gameplay.

WHY GOLFZON? ONLY GOLFZON

OVERVIEW

PART 1

G-TOUR

WHY GOLFZON? ONLY GOLFZON!

PART 2

PART 3

1. Zero Latency

Golfzon's in-house software and hardware guarantee seamless synchronization, eliminating any lag in ball flight when the ball hits the screen.

The transition from physical to virtual is instant, providing immediate response and feedback. This real-time connection and responsiveness keep players fully engaged and focused on the game.

2. Short Game Accuracy

Golfzon excels in delivering an exceptional short-game experience around the green, surpassing other simulators. Our precise sensors and meticulous course mapping combine to provide astonishingly realistic accuracy and detail, whether a player is executing delicate chips or tackling challenging putts.

3. Swing Plate

Motion Plate and Dual Plate are utilized to replicate the undulations of various terrains, creating a realistic playing experience as if on an actual golf course.

4. Network Play

Network Play is the only Real-time Multiplayer Gameplay on the market. Up to 6 golfers can play simultaneously on the same course. Players can compete with others on up to 6 simulators in 6 different locations across the globe. Experience Real-time ball flight as you watch opponents' shots soar through the air.

Performance of TwoVision NX

👉
The most advanced
golf simulator ever created!
👉

A high-end graphics card has been installed, and a high-performance PC capable of running Unreal Engine 5.x, along with a high-definition projector, has been used to create a golf course that feels lifelike.

Not only are the textures and colors of the bunkers realistically depicted, but the sky at sunset and other natural details are brought to life, allowing players to fully experience the field's ambiance.

Additionally, the bunker lip between the bunker and grass has been realistically implemented and insert shots that magnify the ball's position provide detailed information about the ball's location and condition, enhancing the immersion during each round.

The upgraded Motion Plate, designed for a realistic field experience, simulates over 100 different slopes, allowing golfers to play in an environment that mirrors a real course.

TwoVision NX Key Features Hardware

Motion Plate

- Five-segment plates (1 segment for the hitting mat and 4 segments for the stance mat) can create approximately 100 detailed slopes, allowing players to experience a more realistic and diverse range of slopes similar to those on an actual field with a real stance.
- Moreover, weight transfer data can be checked, and on the green, the LED putting guide displays the putting direction.

Weight Shift Analysis Sensor

- Providing a 4-stage weight shift video by integrating AI-analyzed swing video and weight shift sensors : address, backswing top, impact, and finish. (available only with Motion Plate)

TwoVision NX Keypad

- Players can use the keypad to adjust the tee height, use mulligans, skip user turns, and etc. without needing to move to the kiosk, enhancing user convenience.

High-end PC

- High-end graphic card capable of running Unreal Engine 5.x

32" large touch monitor

- 32-inch of large touch monitor maximize ease of use with swipe function

PART 3

TwoVision NX Key Features **Software**

Unreal Engine 5.x

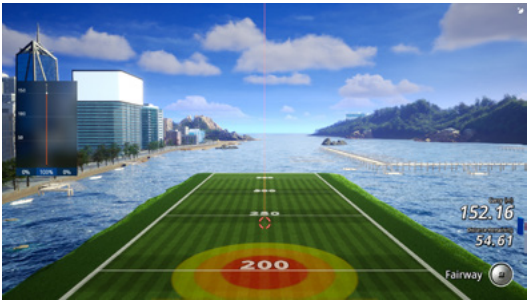

For the first time in golf simulators, Unreal Engine 5.x has been applied as the game engine, achieving near perfection in both performance and functionality.

With highly detailed and realistic graphics that blur the line between reality and the virtual world, it accurately depicts the green's slopes and the colors/textures of the bunkers.

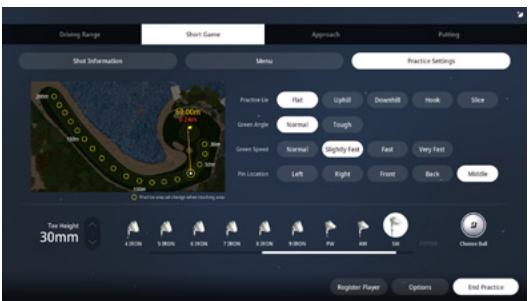

Additionally, every aspect that players can experience in real life has been recreated, from flags fluttering in the wind and divots formed after a precise swing, to the sight of the tee flying off after a tee shot.

Driving range with new views and features

Apex and ball speed data previously only available in course play can now be viewed on the driving range with a panoramic ocean view as a backdrop.

A short game practice range with 18 different spots ranging from 30 to 200 meters, featuring various lies and views for practicing green approaches on flat ground, uphill, downhill, hooks, and slices.

An approach practice range where you can practice from within 30 meters of the fairway, rough, bunker, or anywhere. You can adjust the green speed, hardness, and pin position for realistic practice.

A putting practice range with 80 different putting points, offering various putting lines and speeds on flat ground, uphill, downhill, hooks, and slices. You can practice with LED putting guides for accurate training.

PART 3

TwoVision NX Key Features Software

Ball Position with 3D Terrain View

More detailed views of the ball's position and condition can be established with the 3D magnification insert cut.

Personalized Settings

Individual customization options allow players of all skill levels to enjoy a comfortable round together. Each player can adjust settings such as game difficulty, concede distance, number of mulligans, motion plate activation, and flagstick use during putting.

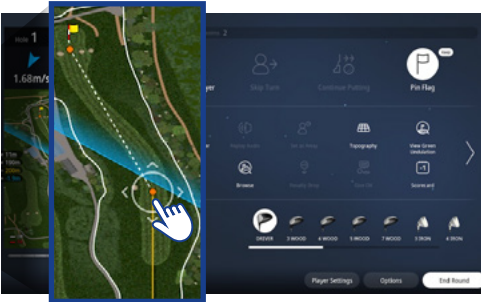

Mulligans are available even if my turn passes

Mulligans are available on TWOVISION NX even after the next player has hit his/her shot. (Only available on the same hole)

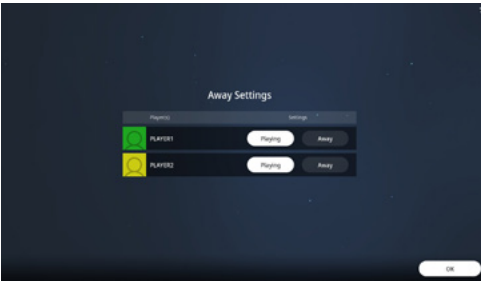

Color Grid on Green

The height of the green is expressed in a different color, making it easier to identify the green when putting.

Dual IP Implementation/ IP Touch Movement

On the kiosk monitor, players can touch and move the IP freely in any direction: up, down, left, or right. The mini-map displays up to two IPs depending on the distance setting for each club, helping players strategize.

Away Settings

The player's turn will be automatically skipped until the away setting is released.

Performance of TwoVision

👉👉
The simulator that changed
the world of indoor golf.

👉👉
Our state-of-the-art TwoVision simulator
utilizes the latest technology to provide an
experience more closely resembling a real
golf course by capturing precise data with
strategically positioned sensors.

Equipped with cutting-edge high-speed,
high-definition dual sensors, TwoVision
surpasses all expectations in data capture
accuracy.

Strategically positioned above and in front
of the player, these sensors converge at
a 90-degree angle, ensuring optimal data
collection from every swing.

With this advanced feature, TwoVision has
the ability to provide real-time ball flight
representation and in-depth swing analysis
with remarkable precision and detail.

GOLFZON PRODUCT - TWOVISION

TwoVision Key Features Hardware

TwoVision Sensor

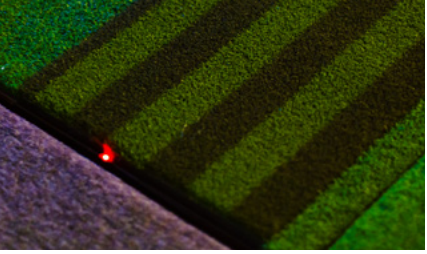

- The most advanced camera sensor (one on the ceiling and one in the kiosk) at 90 degrees provides the most accurate ball flight parameters measuring club path at impact.
- Diminishes any shadow interference from unwanted light sources.
- Compatible with all of our hitting surfaces: tri-surface hitting mat, five-surface hitting mat, moving swing plate, and dual moving swing plates.

Dual Plate

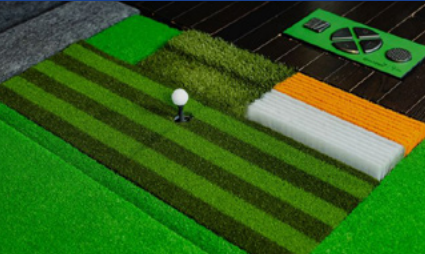

- Two independently moving hitting and stance platform that brings virtual course topography into reality.
- Simulates different slopes on the course where the ball lies with 14 different slope points for a realistic course experience.

LED Putting Guide

- LED visual putting guide is a small LED indicator showing suggested direction of the putting stroke.
- Increases your putting efficiency with this visual aid at the end of the fairway mat.

Five-Surface Mat

- Mat consists of a fairway mat, two types of bunker mats, and two types of rough mats with different textures, enabling a more realistic play from heavy rough to a green-side bunker.

Dual Monitor

- Separate monitors allow you to change the setting from the kiosk control monitor while keeping the main screen monitor at your current game without disruption.

GOLFZON PRODUCT - TWOVISION

TwoVision Key Features - Software

3 Distinct Game Modes

- In the stroke game, choose from 3 levels of game mode and set your course conditions.

Normal Mode

Enjoy playing a round just as you would outside.

Semi-tour Mode

Increased difficulty that challenges seasoned golfers.

Tour Mode

As real as it gets: varying levels of penalties from the rough and bunkers and no putting grid assistance.

Virtual Caddy

- Your virtual caddy shows a personal course guide that appears at the bottom left of the screen to guide you with important information on the course.

Visual Divot Sensing Feedback

- Sensor camera captures club path and angle of attack from your stroke.
- Instantaneous display of club face impact area and the virtual divot your club head has created.
- You can easily see 'ball first' or 'ground first' at impact.

Network Play

- Connect with your golf buddies and play a round of golf any time, anywhere.
- Network Play function allows you to enjoy golf at different locations or different time zones in real time.
- Golfzon is the first golf simulator with social media features that allows cross-game play to compete against your buddies from around the world.

PART 3

Double the excitement of screen golf with this revolutionary fusion of Golfzon and an innovative arcade game.

1 Block Smash

Players swing to blast through gem barriers on their journey to the enchanting Crystal Kingdom. Once you successfully hit the Bomb or the Magic Color Blocks, you will be awarded those items.

2 Dart Golf

Darts golf is an exciting arcade game combining the thrill of darts with the ambiance of a Caribbean pirates' village. Test your precision and aim as you try to score points by targeting a giant dartboard.

3 Slope Golf

Experience the nostalgic amusement park slope game transformed into a golf game. Use your putter to hit the ball into the hole. Tally up scores to determine the winner.

4 Pro Bowl Showdown

We've brought the excitement of the Super Bowl Skill competition to golf. This game will elevate your agility, focus, and precision with accelerating challenges. Feel the exhilaration as you make the perfect strike earning 100 points with a powerful blow!

5 Whack a Mole

Screen golf meets traditional arcade classics that people all over the world love! Moles have infested a peaceful farm and are wreaking havoc on the crops. Hit those pesky moles with a stone ball to score points and witness their comical reaction. Each character has a unique point system.

6 Wild Wild West

This game is inspired by the popular game called Angry Birds. Illuminate the outlaws in buildings by swinging a bullet-shaped ball in this western town. Each hit earns you points as they disappear. With 3 shots per round, score points by shattering the buildings or the outlaws.

Dream Courses at Your Fingertips

At Golfzon, you can experience all the golf courses you've ever dreamed of—from world-renowned international courses to Golfzon's uniquely themed virtual courses.

GDR Plus Software

Access your practice data from the past 30 days and delve into detailed shot analysis with user-friendly graphic displays.

Our redesigned interface simplifies data interpretation, enabling faster coaching and analysis.

1 AI Shot Analysis

The data analysis function, utilizing five shots provides comprehensive swing diagnosis and skills improvement indicators through trend graphs.

2 Skill Test Mode

Immerse yourself in a round of golf at your favorite course, practicing each shot from tee to green with three attempts for every shot. Practice the type of shot you need for each hole. The top center indicator on the screen will clearly display the success of your shot execution for each attempt.

3 Practice Round Mode

In Practice Round mode, you can play any round of golf in any format except for putting on our selection of approximately 30 courses. This mode allows you to check the expected number of strokes for each shot and the score is automatically calculated based on the remaining distance after the ball lands on the green.

4 Fitting Mode

Club Fitting mode is designed to analyze your shot performance for each club based on accumulated statistical data. It provides valuable insights on which club to use for a particular shot on the course.
